 Raipur, India  abhiramalla86@gmail.com  8897428738  GitHub  LinkedIn  Google Scholar

EDUCATION

B.Tech in Computer Science and Engineering	Expected 2027
International Institute of Information Technology (IIIT), Naya Raipur	CGPA: 7.9
Class XII (CBSE) - Telangana	2023 94.9%
Class X (CBSE)	2021 96%

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL, Go
Frontend: React.js, Next.js, React Native, Tailwind CSS, WebAssembly (WASM), TUI Frameworks
Backend & Databases: Node.js, Express, Flask, Systems Programming, Concurrency, API Design
Machine Learning / Data: Data Structures, High-Performance Computing (HPC), Data Science, Machine Learning

EXPERIENCE

Labmentix June 2025 - August 2025

Full Stack Developer Intern

- Developed scalable multi-tenant web applications in React and Node.js, implementing custom state management and reducing API load times by 22%.
- Architected secure storage pipelines and cryptographic signing systems for 'Vaultdrive' and 'Signer', establishing modular, role-based access schemas.

Prime Vacations October 2025 - January 2026

Full Stack Developer Intern

- Refactored legacy UI elements and server processing routes, eliminating rendering latency and eliminating critical runtime server bugs under concurrency tests.
- Engineered a highly concurrent python-based web scraping platform utilizing automated proxy-rotation engines, ensuring low server resource consumption and sub-second execution latency.

PROJECTS

EchoTune [\[GitHub\]](#) May 2026

- Designed an interactive, lightweight keyboard-driven Terminal User Interface (TUI) in Go using the Bubbletea framework, implementing concurrent search requests, reducing CPU usage to <3% compared to browser-based utilities.

In-Browser WebAssembly Query Engine [\[Live\]](#) [\[GitHub\]](#) January 2026 - Present

- Engineered an in-browser database execution engine utilizing Pyodide (WASM) and DuckDB, allowing client-side local queries directly on JSON/CSV datasets, removing server compute overhead entirely.

Vaultdrive [\[Client\]](#) [\[Server\]](#) August 2025 - September 2025

- Built a cloud storage web application enabling users to store and manage files.
- Implemented permission controls to support both private file storage and public link sharing.

event sync [\[GitHub\]](#) July 2025

- Developed a React Native application for event registration.
- Leveraged WebSockets to display live registration updates to users as they join or leave events.

Docquer [\[GitHub\]](#) Nov 2024 - Dec 2024

- Created a customizable chatbot interface supporting bring-your-own API keys.
- Implemented a custom Markdown renderer to correctly display complex outputs like tables and code blocks in chat responses.

Nakama [\[GitHub\]](#) Aug 2024 - Sep 2024

- Built a real-time socket-based chatting application.
- Focused on state synchronization to ensure reliable, error-free bidirectional message delivery between clients.

Readit [\[GitHub\]](#) Mar 2024 - May 2025

- Developed a social media platform featuring posts, image handling, and community creation.

CERTIFICATIONS & ACHIEVEMENTS

- Publications:** Published 2 peer-reviewed Research papers in IJRSI journal, demonstrating rigorous architectural analysis, technical writing, and problem validation.
- Test Ranks:** JEE Advance Rank: 11802 | JEE Mains Rank: 24545
- Expertise:** Parallel Computing, High-Performance Computing (HPC), Engine Optimization, and Computational Infrastructure.
